Abhishesh Ramadas Shet

Bengaluru, India | +91 9008262671 | abhishesh.shet@gmail.com | linkedin.com/in/abhishesh-ramadas-shet | github.com/abhi0874

Summary

Recent Bachelor of Engineering (B.E.) graduate in AI & ML (June 2026, CGPA 8.73) who builds across the stack, from Android applications to AI-powered tools, with a focus on thoughtful design and reliable engineering. Works with Python, Java and Kotlin, Generative AI APIs and PostgreSQL, and uses AI tools such as ChatGPT, Gemini and Claude while testing and reviewing what they produce. Experienced in debugging, unit testing, Git workflows and code reviews.

Education

Sir M Visvesvaraya Institute of Technology — Bengaluru, Karnataka, India
B.E. in Artificial Intelligence & Machine Learning | CGPA: 8.73 — *Dec 2022 – Jun 2026*

Gurukula Pre-University College — Kundapura, Karnataka, India
Physics, Chemistry, Mathematics & Computer Science | 94.67% — *Jun 2020 – Apr 2022*

Experience

MindMatrix.io — Remote
Software Developer Intern — *Feb 2026 – May 2026*

- Developed Android applications in Kotlin and Jetpack Compose using Android Studio, Google Cloud Labs and Google AI Studio to explore Generative AI capabilities in application development.
- Worked through UI/UX design, prototyping and feature development, then debugging and iterative enhancements, with project-based learning in Firebase integration, testing and standard Android development workflows.

Projects

RAG Document Assistant | *Python, PostgreSQL (pgvector), Next.js (React), Gemini API* — GitHub

- Built a web application with a Next.js chat interface and Python API endpoints that store uploaded documents in PostgreSQL with pgvector and answer questions about them through the Gemini API.
- Tuned document chunking for semantic similarity search, reducing query latency by 98%.

Kutira Kushala — Android Marketplace | *Kotlin, Java, MVVM, Firebase, Google AI Studio* — GitHub

- Built a user-friendly Android marketplace with sign-in authentication where artisans and home-based businesses create profiles, upload products, manage production capacity, and connect directly with buyers.
- Delivered high-performance Gen AI user-facing features in a production Android application by engineering Java/Kotlin asynchronous API pipelines, with structured unit testing and rigorous debugging for a stable release.

CampusCompass — Indoor Navigation System | *Python, OpenCV, NetworkX, Pandas* — GitHub

- Engineered an indoor pathfinding algorithm using NetworkX's Dijkstra implementation, building the graph from CSV node and edge files and drawing labelled routes on the annotated map image with OpenCV.
- Collaborated as a core developer in a team using Git version control, pull requests, and code reviews.

Certifications

Oracle: Cloud Infrastructure 2025 Generative AI Professional | Cloud Infrastructure 2025 Data Science Professional
Google (Coursera): Data Analytics | Project Management | IT Automation with Python (Professional Certificates)
Anthropic: Building with the Claude API | Claude 101 | Introduction to Claude Cowork
freeCodeCamp: JavaScript Algorithms & Data Structures

Technical Skills

Languages: Python, C/C++, Java, Kotlin, JavaScript, SQL (PostgreSQL, SQLite)
AI & ML: LLM APIs (Gemini, Claude), RAG, Embeddings (pgvector), TensorFlow, CNNs, OpenCV, Pandas
Web & Tools: Next.js, React, Git, GitHub, Postman, Android Studio, Google AI Studio, Google Cloud
Fundamentals: Data Structures & Algorithms, OOP, Unit Testing, Debugging, Code Reviews
